_____

PLEASE READ CAREFULLY AND SIGN

Your pet is scheduled for anesthesia/surgery. We recommend a blood profile to ensure that your pet is in a low risk category prior to anesthesia. The latest technology has enabled us to run safe accurate blood chemistries minutes before anesthetic induction. These tests are similar to those your own physician would run were you to go under anesthesia. In addition, the results of these tests will serve as reference values for the future use should your pet become ill.

PROFILE #1 YOUNG HEALTHY PATIENTS COST= $71.32

INCLUDES: Complete Blood Count (assess anemia, infection, and clotting), BUN (Kidney), ALT (Liver), Glucose (Sugar), Creatine (Kidney), Total Protein, Alkaline Phosphates (Liver and Muscle).

PROFILE #2 OLDER HIGH RISK PATIENTS COST= $102.22

INCLUDES: All the test in Profile #1 plus Albumin, Globulin, Amylase (Pancreas), Chloesterol, Total Bilirubin (Liver and Gallbladder), Phosphate, Calcium, Sodium, Potassium and Chloride (Electrolytes).

CHECK ONE _____ PROFILE #1 $71.32

_____ PROFILE #2 $102.22

_____ I have elected to refuse the recommended pre-anesthetic blood work at this time and request that you proceed with anesthesia.

I assume full responsibility for this/these animal(s). I understand there is always a potential risk for anesthesia and surgery.
